

PLAYROOM

IPTV General Features

Customizable Channel Lists:

With Playroom IPTV it's very easy to find a channel and channel transition time is below 2 seconds. Channel logo and country flag can be placed next to each TV channel. TV channels can be sorted between each other.

This way the TV channels can be categorized under different menus such as news, sport, entertainment, radio etc., enabling the user to find the desired channel and content.

As long as the capacity of the IPTV headend is increased, there is no limitation on the number of channels.

Digital TV Signal Quality:

Digital TV broadcast distributed to the rooms, is at least of DVD quality. All the noise is eliminated due to the digital infrastructure. The system is also supports receiving of channels in 720p, 1080i, 1080p HD formats.

Easy User Interface:

The user interface on the TV screen is very intuitive and easy to use. The simple and elegant design enables even a first time user to navigate without much effort.

TV channels specified by the guest are sorted according to his/her nationality and therefore desired channels appear in the first places. A group of TV channels can be assigned to a specific group of guests, so only guests that belong to this group can watch these channels.

PLAYROOM

IPTV General Features

Possibility of Charging TV Usage:

It is possible to charge the guest for watching any TV channel or a group of TV channels. The management is free to specify the invoicing method and prices. There are two different pricing options with Playroom:

- Charging for an individual channel or charging for a group of channels. If no rate is specified service is free of charge for the users.
- With "Add a new pricing" many usage time intervals can be defined as requested. A different price can be set for each interval. The price list is displayed on the TV screen. When a time interval is purchased through the TV screen, the user will be able to watch the TV channel during the that time interval.

TV Groups:

TV channel groups can be defined for easy navigation on the user TV interface. By default, there are three pre-defined groups.

National Channels: Channels from the country that the system is installed.

Foreign Channels: Channels from other countries.

Radio: Live radio stations
