# PLAYRO M

PRMPMS-200

PMS INTERFACE

This feature is a management interface for the hospitality business that was designed in order to use the PlayActive package.

Welcome Pages:

After the guests check-in at the building, when they turn on the TV in the room allocated to them, a welcome screen will appear in their own language. The system provides this automatically. At this stage,They will be able to change the language as they wish. After the language selection, if provided by the hotel, introductory video will be played by the system.

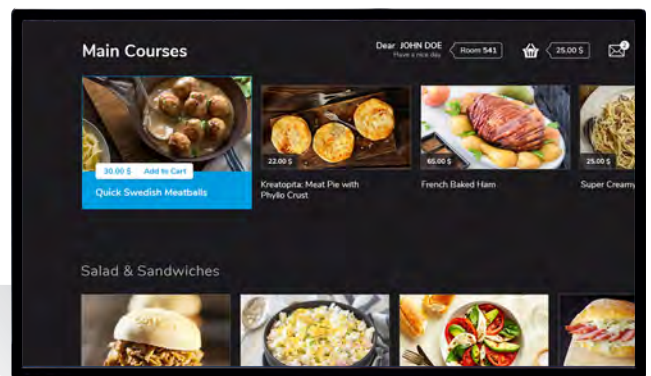

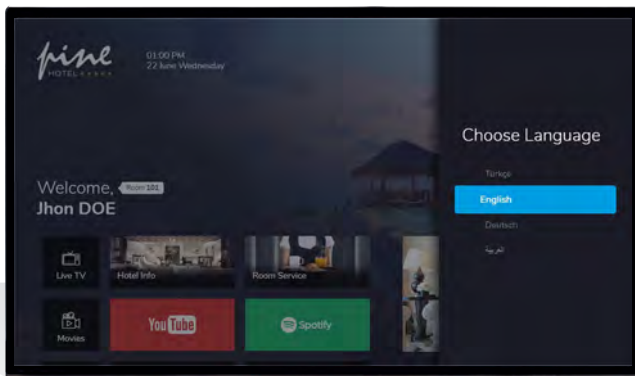

Message Feature:

The hotel personnel is able to send e-mail messages to TVs directly from the PMS system..

Room Service:

The food and drinks orders given by the guests from the TV menu can be viewed on the system. The menu will consist of both text and images.

1

Automatic Language Selection:

After check-in, a welcome screen can be created automatically on the system according to the guest's language. Standard languages include Turkish, English, German, Spanish, Italian, French, Arabic, Russian and Portuguese. Additional languages could be added on request. There is no limitation in the number of languages.

Bill View

The guests can see all their charges until the current date. This information will be pulled from the PMS system (e.g. Opera).
